

Purpose Built with Pride in the USA since 1946

Pacific Floorcare Auto Scrubbers Are Built for VA Hospital's Environment of Care

Cleanliness in a VA hospital isn't a preference — it's a requirement. Patients depend on sanitary, safe environments to heal, and facilities managers are responsible for delivering exactly that, every single day. The equipment you choose plays a direct role in meeting those standards.

Pacific Floorcare auto scrubbers are purpose-built to support the demanding, high-traffic environments found in VA healthcare facilities. From Buy America compliance to industry-leading warranties and cutting-edge cleaning technology, here's why Pacific is the clear choice for your environment of care.

Simple. Reliable. Durable. American.

Pacific S-28 Disk Auto Scrubber

Model: 875410

Features:

- 28 inch cleaning path
- 70, 110 & 150 lb down pressure
- Self-adjusting, robust squeegee
- 250AH AGM Maintenance Free Batteries
- On-Board Charger
- Auto On/Off Pad Installation & Removal
- Low 65 dBA

Pacific S-20 Disk Auto Scrubber

Model: 855404

Features:

- 20 inch cleaning path
- 60 & 90 lb down pressure
- Self-adjusting, robust squeegee
- 140AH AGM Maintenance Free Batteries
- On-Board Charger
- Auto On/Off Pad Installation & Removal
- Low 63 dBA

1. Pacific Machines Satisfy the Buy America Act

Pacific Floorcare's S-Series auto scrubbers satisfy Buy America act compliance. Every auto scrubber is built in Muskegon, Michigan, where Pacific has operated since 1946. With 75%+ of components sourced from North America and a robust domestic supply chain that was deliberately strengthened long before post-pandemic disruptions hit, Pacific machines meet the requirements of the Buy American Act with confidence.

Choosing Pacific means choosing compliant, domestic manufacturing — no workarounds, no risk.

2. The Most Comprehensive Auto Scrubber Warranty in the Industry

When budget cycles are fixed and downtime is not an option, warranty coverage matters enormously. Pacific offers the most comprehensive auto scrubber warranty available:

- **Tanks:** 10-year warranty
- **Parts:** 5-year warranty
- **Labor:** 3-year warranty

Compare that to the competition. The top competing manufacturers offer tank warranties of 8–10 years, parts warranties of just 3 years, and most labor coverages of 2 years.

Pacific's warranty isn't just the most comprehensive in the industry — it's a direct investment in your facility's long-term operational budget and reliability.

3. 100% End-of-Line Quality Control — Every Single Machine

In a healthcare environment, there is no room for equipment that underperforms on day one. Every Pacific auto scrubber undergoes a rigorous **30-minute, 40-point quality control test** before it leaves the factory. Every machine is wet-tested prior to shipment.

This isn't a spot-check process — it's 100% end-of-line testing, applied to every unit. For VA hospitals, that means the scrubber arriving at your loading dock has already been proven to perform before it ever touches your floors. Less commissioning time. Less troubleshooting. More confidence.

4. Fast Lead Times Mean Your Facility Is Never Left Waiting

Equipment downtime in a VA hospital environment isn't just inconvenient — it directly affects your ability to maintain sanitation standards. Pacific understands that, which is why they've built their supply chain for speed.

Most scrubber orders ship within 3 business days from the date of order. That's a direct result of Pacific's decade-long commitment to domestic on-shoring, which began in 2012 and positioned the company to avoid the supply chain disruptions that have plagued competitors relying on overseas manufacturing.

For facilities managers coordinating procurement with budget cycles and operational schedules, that kind of reliability is invaluable.

When the standard of care depends on the cleanliness of your environment, the equipment you choose needs to be as dependable as your team. Pacific Floorcare auto scrubbers deliver Buy America compliance, industry-leading warranties, patented technology, and proven quality control — purpose-built for facilities where nothing less than excellent will do.
